

# INOURNATURE

## Getting to know trees in winter

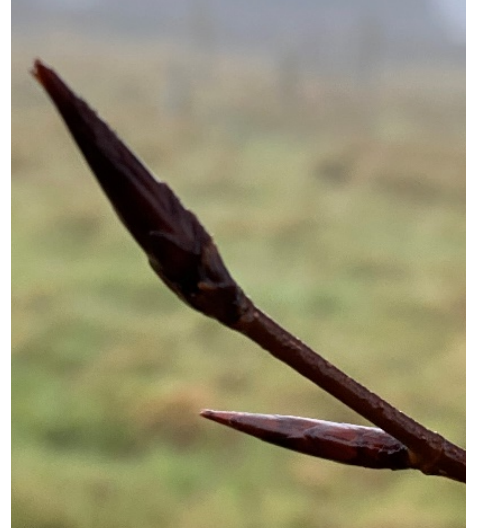

### Alder

Distinctive male catkins and female catkins that look like cones

### Ash

There's no mistaking the black buds

### Beech

Long scaled buds that reach a sharp point

### Elder

Opposite buds and corky bark

### Hawthorn

Buds emerge from same point as thorns

### Hazel

Distinctive catkins emerge early spring

# INOURNATURE CIC

## Getting to know trees in winter

### Holly

Well known tree with evergreen spiky leaves and red berries

### Horse Chestnut

Very large, reddish sticky buds in opposite pairs

### Oak

Buds at the end of the twig grow in a cluster

### Silver Birch

Very light coloured, silvery bark

### Sweet Chestnut

Large buds that each sit on a little 'shelf'

### Willow

Buds erupt into soft, velvety flowers
